Merger *et al* (US 4,997,955) teach the preparation of 1,1-disubstituted ethylene compounds from a formyl compound of formula II in the presence of a formaldehyde or para formaldehyde, alkanol, and secondary amine under specific set of reaction conditions. The instant process for preparing a compound of formula (A), which differs from the prior art by having a direct chemical reaction between intermediate compounds (C) and (D) to obtain the final product of compound of formula (A). The prior art process neither teaches nor renders obvious the instantly claimed invention and there is no suggestion or motivation to modify the process of other prior art to obtain the instant process. Therefore the instant claims are allowable over the prior art of record.
